Conflict Minerals Report of Gentherm Incorporated

This Conflict Minerals Report of Gentherm Incorporated (“Gentherm”, “we”, “us”, “our” or the “Company”) covers the reporting period from January 1 to December 31, 2025. This report was prepared in accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended.

Business Overview

Gentherm is a global market leader of innovative thermal management and pneumatic comfort technologies. Our automotive products include Climate Control Seats (CCS®), Climate Control Interiors (CCI™), Lumbar and Massage Comfort Solutions, Valve Systems, and Climate and Comfort Electronics. We operate in locations aligned with our major customers’ product strategies to provide locally enhanced design, integration and production capabilities. Our medical products include patient temperature management systems that can be found in hospitals throughout the world.

Product Description

For 2025, the Company is organized under two reportable segments: Automotive and Medical.

The Automotive reporting segment is comprised of our global automotive businesses, including the design, development, manufacturing and sales of our Automotive Climate and Comfort Solutions (including CCS, CCI, Lumbar and Massage Comfort Solutions and Climate and Comfort Electronics), Valve Systems and other automotive products.

The Medical reporting segment is comprised of our patient temperature management business in the medical industry. Patient temperature management includes temperature management systems across multiple product categories addressing the needs of hyper-hypothermia therapy in intensive care, normothermia in surgical procedures and additional warming/cooling therapies utilized in acute and chronic care departments and non-hospital facilities.

The products that the Company manufactured or contracted to have manufactured in 2025 that it determined contain or may contain any 3TG (as defined below) are listed below (the “Covered Products”).

- Automotive Climate and Comfort Solutions
 - Climate Control Seats (CCS®)
 - Climate Control Interiors (CCI™)
 - Lumbar and Massage Comfort Solutions
 - Climate and Comfort Electronics
- Valve Systems
- Other Automotive
- Medical – Patient Temperature Management Systems

Due Diligence Framework and Overview

Rules applicable to this Conflict Minerals Report require disclosure of certain information when a company manufactures or contracts to manufacture products for which conflict minerals (coltan, cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin and tungsten, collectively “Conflict Minerals” or “3TG”) are necessary to the functionality or production of those products. We undertook due diligence on the source and chain of custody of Conflict Minerals that are

necessary to the functionality or production of products manufactured or contracted to be manufactured by us, which for the Covered Products includes tantalum, tin, tungsten, and gold. We designed our due diligence to conform to an internationally recognized due diligence framework, the Organization for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition, and related supplements (“OECD Framework”).

The OECD Framework divides the entire Conflict Mineral supply chain into upstream and downstream entities. An upstream entity is within the Conflict Mineral supply chain from the mine to the smelter or refiner and includes miners, local traders, and exporters from the country of mineral origin, international concentrate traders, mineral processors, smelters, and refiners. A downstream entity is within the Conflict Mineral supply chain from when the mineral leaves the smelter or refiner to when it arrives at the retailer and includes metal traders and exchanges, component manufacturers, product manufacturers, original equipment manufacturers, and retailers.

The Company is a downstream entity and is typically several tiers removed from the smelter or refiner and the origin of the Conflict Minerals present in our supply chain for Covered Products. We have limited visibility beyond our direct suppliers to entities within the supply chain. Therefore, we rely principally on our direct suppliers to provide us with sourcing information for the Conflict Minerals present in their supply chain.

We conduct a portion of our due diligence using tools and relying on information provided by the Responsible Minerals Initiative (“RMI”), an industry group that works to address Conflict Minerals issues within supply chains. We use the Conflict Minerals Reporting Template (“CMRT”) to facilitate the collection of information on the source of Conflict Minerals. We also rely on appropriate third-party assessments of smelter and refiner management systems and sourcing practices for Conflict Minerals to validate conformance with appropriate practices.

Due Diligence Process

The OECD Framework provides a five-step framework for risk-based due diligence in the Conflict Mineral supply chain. Set forth below, we disclose the actions we took to exercise due diligence under this framework for the sourcing of Conflict Minerals we used or may have used when manufacturing or contracting to manufacture the Covered Products.

Step 1 - Establish strong company management systems

- In 2025, we updated and expanded our Responsible Sourcing Policy for Minerals and Other Raw Materials (the “Responsible Sourcing Policy”). We then communicated to our suppliers and other stakeholders about this revised policy. This policy states our commitment to source minerals and other raw materials in a responsible and ethical manner. This policy also includes requirements for suppliers to utilize smelters, refiners and processors that have been validated as conformant to an applicable independent OECD aligned, third party-assured responsible sourcing validation program. The Responsible Sourcing Policy is publicly available on our corporate website:

<https://ir.gentherm.com/corporate-governance/policies-reports>

- Gentherm’s standard purchasing Terms and Conditions require compliance with all statutory legal requirements currently in effect or as may be implemented from time to time relating to its products, including the Covered Products, and are available on our corporate website:
<https://gentherm.com/en/automotive/automotive-resource-center/>
- The Company utilizes an internal team, primarily led by our Legal and Compliance employees, with support from our Purchasing and Supplier Quality employees (the “Conflict Minerals Team”). This team has oversight and ownership of the Responsible Sourcing Policy and public reporting matters. Such efforts include determining the program scope and process, collecting and reviewing supplier submissions and information and addressing the implementation and progress of our due diligence.
- The Company engaged a third party to assist in the collection and aggregation of supplier submissions, as well as managing related communications.
- The Company utilizes a Conflict Minerals Platform provided by such third party, which includes an on-demand software solution that enables the Company to collect, manage, aggregate, validate, and report Conflict Minerals information. Furthermore, the platform allows the Conflict Minerals Team to perform an assessment of the applicable smelter and refiner list and the completeness and accuracy of the CMRT responses, which we utilize as part of our own assessment of CMRT responses.
- The Company has adopted the CMRT as our primary means of collecting data from our In-Scope Suppliers (as defined below). We encourage these suppliers to use the most current CMRT when reporting to us and obtaining information from their supply chains.

Step 2 - Identify and assess risks in the supply chain

- Gentherm has instituted Conflict Minerals reporting requirements as part of our suppliers’ contractual obligations through our onboarding process, and we have encouraged our suppliers to extend the same obligations to their supply chains.
- The Company, via our third-party service provider, conducted a survey of our In-Scope Suppliers and/or the CMRT to identify the smelters, refiners and processors in our supply chain for Covered Products. The Company also undertook reasonable efforts to obtain and review additional information on responses that were incomplete, unclear, or inconsistent.
- For In-Scope Suppliers that are distributors and cannot legally report on behalf of their supply chain, we asked that they issue a statement or otherwise provide confirmation regarding their company’s position on Conflict Minerals. Additionally, such suppliers can supplement their statement with CMRTs that have been submitted by their supply chain.

Step 3 - Design and implement a strategy to respond to identified risks

- The Conflict Minerals Team reported findings of supply chain risk to the appropriate leadership, including Legal and Compliance, Purchasing, and Supplier Quality employees.
- The Conflict Minerals Team implemented reasonable procedures to address certain In-Scope Suppliers who did not respond to initial requests. These procedures included follow-up requests, communication involving buyers and purchasing leadership, management escalation, and direct communication including emails and phone calls.

- Gentherm adopted a supplier escalation process in accordance with the Responsible Sourcing Policy, with the intention to discontinue business if it determined that a supplier purchased 3TG that directly or indirectly financed or benefitted armed groups in the DRC and adjoining countries (collectively the “Covered Countries”), or that may have been sourced from a location otherwise sanctioned by applicable laws or regulations.
- The Company reviewed submitted CMRTs and other information for completeness and reasonableness of responses.
- In 2025, the Company implemented a process to track and monitor all non-conformant or high-risk smelters and refiners reported from parties within our supply chain. A list of such smelters and refiners is managed and tracked by our Legal and Compliance team. Such list is then provided to our suppliers, with correspondence noting that the listed smelters and refiners should not be present in products supplied to Gentherm, and requiring our suppliers to work to remove those smelters and refiners. This iterative tracking and communication process helps drive the removal of specific smelters and refiners from our products.

Step 4 - Carry out independent third-party audits of supplier’s due diligence practices

- The Company utilizes, when necessary, the appropriate third-party assessments to validate its due diligence in conformance with the OECD Framework. This process confirms if a smelter or refiner has completed an appropriate third-party audit and has maintained good standing with the program and continual validation process. Gentherm works with submitted data and participating In-Scope Suppliers to identify smelters, refiners and processors in the supply chain for Covered Products and encourages In-Scope Suppliers to participate in the program through direct communication and smelter outreach communication.

Step 5 - Report annually on supply chain due diligence

- Gentherm annually publishes information regarding our supply chain due diligence within our Form SD and Conflict Minerals Report on our website:

<https://ir.gentherm.com/financial-information/sec-filings>

RCOI and Due Diligence Measures Performed

The Company’s Reasonable Country of Origin Inquiry (“RCOI”) was designed to determine whether the Conflict Minerals, which are necessary to the functionality or production of a product manufactured (or contracted to be manufactured) by the Company, originated in the Covered Countries. The Company performed a good faith, risk-based, global scoping exercise to identify suppliers of Covered Products that were considered in-scope and therefore subject to RCOI in the 2025 calendar year. Through communications with these suppliers, the Company attempted to identify smelters, refiners and processors of Conflict Minerals that are or may be utilized in the Covered Products during the reporting period.

The Company's RCOI and due diligence employed a combination of measures to determine whether the necessary Conflict Minerals in the Covered Products originated from the Covered Countries. The Company identified suppliers of commodity groups with high potential of containing Conflict Minerals. In other cases, the materials supplied were analyzed by other means. All identified first-tier suppliers of Conflict Minerals were surveyed to ascertain for each Conflict Mineral (a) the smelter or refiner where it was processed, (b) its country of origin and (c) the mine or location of origin, using the CMRT and appropriate third-party assessments.

The Company strives for participation of all In-Scope Suppliers but did not receive responses from all of such suppliers and, in some cases, responses were incomplete or did not appear to be accurate, even after reasonable follow-up. Furthermore, the majority of our suppliers that did provide names of smelters, refiners and processors and country of origin information, did so only on an entity-wide basis without distinguishing between 3TG purchased for goods supplied to Gentherm and 3TG purchased for other purposes. Because we did not receive full and complete responses covering products supplied to Gentherm from every supplier in every case, we were unable to determine the country of origin of Conflict Minerals for some of the Covered Products or whether such Conflict Minerals for Covered Products were from recycled or scrap sources.

Smelters, Refiners and Processors

Gentherm identified 585 suppliers of Covered Products that were considered in-scope and subject to RCOI in the 2025 calendar year (the "In-Scope Suppliers"). These In-Scope Suppliers covered approximately \$411 million, representing over 70%, of our total material spending in 2025. Out-of-scope suppliers included those suppliers providing exclusively products that were evaluated and determined to contain no metallic content or to be of de minimus spend. We received CMRTs or similar supporting data covering over 92% of the in-scope material spend in 2025.

The smelters, refiners and processors that our suppliers identified in the CMRTs submitted to us for this reporting year are provided in a listing in Attachment A to this report. As noted above, the majority of the CMRTs we received from our suppliers were made on an entity-wide basis, rather than on a product-level basis. Therefore, we believe the list of smelters in Attachment A both omits smelters that are in the Company's supply chain for Covered Products and includes smelters that are not in the Company's supply chain for Covered Products. Gentherm is working with all in-scope suppliers to obtain detailed data related to Gentherm products and to require suppliers to migrate to 100% usage of conformant smelters.

Due Diligence Enhancements

We consider ongoing compliance improvements during each reporting period to (1) increase our ability to determine the country of origin of the Conflict Minerals and the facilities used to mine and refine the Conflict Minerals used in, and necessary to, the functionality or production of our products, including by obtaining more Company-specific product information, and (2) further mitigate the risks that necessary Conflict Minerals contained in the Company's products finance or benefit armed groups in Covered Countries. Additional steps may include the following:

- Continue to strengthen our engagement with our suppliers regarding Conflict Minerals, including requiring CMRT information from In-Scope Suppliers and new suppliers for all Gentherm locations, including suppliers from recent acquisitions within a reasonable time.

- Continue to educate and drive our suppliers to provide current, accurate, and complete information from their supply chains regarding their smelters, refiners and processors of Conflict Minerals, including providing data at a product or customer specific level.
- Strengthen engagement with our suppliers by encouraging an open line of communication throughout the year, including involving Gentherm Purchasing and Supplier Quality teams to more actively engage our suppliers.
- Working with our supply base to migrate to exclusively using smelters conformant with an appropriate third-party assessment process. As noted previously, our new process tracks all non-conformant or high-risk smelters and refiners that were reported to us as part of our CMRT collection process. A list of such smelters and refiners is then delivered to our suppliers to continue our efforts to eliminate those parties from our supply chain.

Forward-Looking Statements

Except for historical information contained herein, statements in this Conflict Minerals Report are forward-looking statements that are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The principal forward-looking statements in this Conflict Minerals Report include the Company's expected or potential changes to its Conflict Minerals program and the Company's future efforts and suppliers involvement with respect to RCOI and sourcing due diligence. The forward-looking statements included in this Conflict Minerals Report are made as of the date hereof or as of the date specified herein and are based on management's reasonable expectations and beliefs. Such statements are subject to a number of important assumptions, risks, uncertainties and other factors that may cause actual results or performance to differ materially from that described in or indicated by the forward-looking statements, including (a) the continued implementation of compliance measures by the Company's direct and indirect suppliers, (b) global changes in regulatory requirements and geopolitical developments relating to or impacting the sourcing of 3TG, (c) our suppliers' responsiveness and cooperation with the Company's RCOI and due diligence efforts and our ability to obtain specific sourcing information regarding our products from our suppliers, (d) the Company's integration of any future acquisitions, (e) the effectiveness and evolving standards of the RMI, OECD and other sources of frameworks, audits, guidance and support, and (f) those factors described under "Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2025 and subsequent reports filed with or furnished to the Securities and Exchange Commission. Except as required by law, the Company expressly disclaims any obligation or undertaking to update any forward-looking statements to reflect any change in its expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

Attachment A

The Company compiled the following information from CMRTs submitted by its In-Scope Suppliers as part its RCOI and due diligence measures covering all of 2025. The smelter names listed below are based on information made publicly available by the RMI as part of appropriate third-party assessments as of May 4, 2026.
