Section 1 – Conflict Minerals Disclosure**Item 1.01 Conflict Minerals Disclosure and Report**

A copy of the Conflict Minerals Report of Gentherm Incorporated for the reporting period January 1, 2021 to December 31, 2021 is provided as Exhibit 1.01 hereto. Such report is also publicly available at <https://gentherm.gcs-web.com/financial-information/sec-filings>. The information included in such Conflict Minerals Report is incorporated herein by reference herein. This Form SD, including Exhibit 1.01 attached hereto, contains references to our website; however, the information on our website is not incorporated by reference into this Form SD or Exhibit 1.01.

Item 1.02 Exhibit

The Conflict Minerals Report as required by Item 1.01 of Form SD is filed herewith as Exhibit 1.01.

Section 2 – Resource Extraction Issuer Disclosure**Item 2.01 Resource Extraction Issuer Disclosure and Report**

Not applicable.

Section 3 – Exhibits**Item 3.01 Exhibits**

Exhibit 1.01 Conflict Minerals Report as required by Items 1.01 and 1.02 of Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Conflict Minerals Report of Gentherm Incorporated

This Conflict Minerals Report of Gentherm Incorporated (“Gentherm”, “we”, or the “Company”) covers the reporting period from January 1 to December 31, 2021. This report was prepared in accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended.

Business Overview

Gentherm Incorporated is a global developer, manufacturer and marketer of innovative thermal management technologies for a broad range of heating, cooling and temperature control applications, primarily in the automotive and medical industries. Within the automotive industry, our products provide solutions for passenger climate comfort and convenience, battery thermal management and cell connecting systems. Within the medical industry our products provide patient temperature management solutions. Our automotive products can be found on vehicles manufactured by nearly all the major automotive original equipment manufacturers (OEMs) operating in North America and Europe, and several major OEMs in Asia. We operate in locations aligned with our major customers’ product strategies to provide locally enhanced design, integration and production capabilities. The Company is also developing a number of new technologies and products that are expected to enable improvements to existing products and to create new product applications for existing and new markets.

The products that the Company manufactured or contracted to have manufactured in 2021 that it determined contain or may contain any 3TG (as defined below) are listed below.

- Automotive Passenger Climate Comfort and Convenience Products:
 - Heater Mats
 - Air Moving Devices
 - Thermoelectric Modules
 - Electronic Control Modules
 - Thermal Cup Holders and Bins
- Battery Performance Systems:
 - Thermoelectric Cooling Modules
 - Battery Heaters
 - Battery Cell Connecting Boards
 - Wiring Harnesses and Cables
- Electronics and Medical Products:
 - Printed Circuit Boards
 - Patient Thermal Management Devices
 - Cardiovascular Heater/Cooler Devices

Due Diligence Framework and Overview

We undertook due diligence on the source and chain of custody of the tantalum, tin, tungsten, and gold (“Conflict Minerals” or “3TG”) we use when producing our products. We designed our due diligence to conform to an internationally recognized due diligence framework, the Organization for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition, and related supplements (“OECD Framework”).

The OECD Framework divides the entire conflict mineral supply chain into upstream and downstream entities. An upstream entity is within the conflict minerals supply chain from the mine to the smelter or refiner and includes miners, local traders, and exporters from the country of mineral origin, international concentrate traders, mineral processors, smelters, and refiners. A downstream entity is within the conflict minerals supply chain from when the mineral leaves the smelter or refiner to when it arrives at the retailer and includes metal traders and exchanges, component manufacturers, product manufacturers, original equipment manufacturers, and retailers.

The Company is a downstream entity and is typically several tiers removed from the smelter or refiner and mineral origin. We have limited visibility beyond our direct suppliers to entities within the supply chain. Therefore, we rely principally on our direct suppliers to provide us with sourcing information.

We conduct a portion of our due diligence using tools and relying on information provided by the Responsible Minerals Initiative (“RMI”), an industry group that works to address Conflict Minerals issues within supply chains. We use the Conflict Minerals Reporting Template (“CMRT”) to facilitate the collection of information on the source of Conflict Minerals. We also rely on RMI’s Responsible Minerals Assurance Process (“RMAP”), formerly the Conflict-Free Smelter Program, which uses an independent third-party assessment of smelter/refiner management systems and sourcing practices to validate conformance with RMAP standards.

Due Diligence Process

The OECD Framework provides a five-step framework for risk-based due diligence in the mineral supply chain. Using this framework, we list the actions we took to exercise due diligence on the sourcing of Conflict Minerals we used when manufacturing our products.

Step 1—Establish strong company management systems

- Gentherm communicated to our suppliers and the public a formal company policy (“Conflict Minerals Policy”) concerning the use of Conflict Minerals which directly or indirectly finance or benefit armed groups in the Democratic Republic of Congo or an adjoining country (collectively, the “Covered Countries”). The Conflict Minerals Policy is publicly available on our corporate website: <https://gentherm.gcs-web.com/policies-reports>.
- Gentherm’s standard purchasing Terms and Conditions require compliance with all statutory legal requirements currently in effect or as may be implemented from time to time relating to its products, including Conflict Minerals and are available on our corporate website: <https://gentherm.com/sites/default/files/documents/Terms%20and%20Conditions%20-%20English.pdf>.
- Gentherm assembled a cross-functional internal team to implement our Conflict Minerals Policy, including representation from Purchasing, Legal, Finance, Engineering, Quality, IT, and Sales/Program Management.
- The Company structured an internal management and support system (“Conflict Minerals Leadership Team”), made up of a cross-section of senior management, which has oversight and ownership of the Conflict Minerals Policy. In addition, Gentherm maintained a Conflict Minerals working group that met regularly during the reporting period to address the implementation and progress of our due diligence efforts.

- The Company subscribed to a Conflict Minerals Platform (“iPoint”), an on-demand software solution which enables the Company to collect, manage, aggregate, validate, and report Conflict Minerals information. Furthermore, iPoint performs an automated assessment of smelter list and overall CMRT completeness and accuracy.
- The Company adopted the CMRT as our primary means of collecting data from suppliers. We encourage our suppliers to adopt the most current CMRT when reporting.

Step 2—Identify and assess risks in the supply chain

- Gentherm has instituted Conflict Minerals reporting requirements as part of our suppliers’ contractual obligations through our onboarding process, and we have encouraged our suppliers to extend the same obligations to their supply base.
- The Company conducted a survey of our suppliers using iPoint and/or the CMRT to identify the smelters and refiners in our supply chain. The Company also reviewed and obtained additional information on responses that were incomplete, unclear, or inconsistent.
- For suppliers that are distributors and cannot legally report on behalf of their supply base, we ask that they put forth a statement regarding their company’s position on Conflict Minerals. Additionally, they can supplement their statement with CMRTs that have been submitted by their supply base.

Step 3—Design and implement a strategy to respond to identified risks

- The Company’s Conflict Minerals working group reported findings of supply chain risk to the appropriate leadership including the Conflict Minerals Leadership Team.
- The Conflict Minerals Leadership Team implemented procedures to address suppliers who did not respond to initial requests. These procedures include follow-up requests, communication involving buyers and purchasing leadership, management escalation, and direct communication including emails and phone calls.
- Gentherm adopted a Supplier Escalation Process in accordance with the Conflict Minerals Policy, with the intention to discontinue business with any supplier found to be purchasing 3TG which directly or indirectly finances or benefits armed groups in the Covered Countries.
- The Company reviewed submitted CMRTs for completeness and reasonableness of responses.

Step 4—Carry out independent third-party audits of supplier’s due diligence practices

- The Company utilizes, when necessary, the RMI’s RMAP assessments to validate its due diligence in conformance with the OECD Framework. Gentherm works with other resources to identify smelters in the supply chain and encourages suppliers to participate in the program through direct communication and smelter outreach communication.

Step 5—Report annually on supply chain due diligence

- Gentherm published our supply chain due diligence within our 2021 Form SD and Conflict Minerals Report on our website: <https://gentherm.gcs-web.com/financial-information/sec-filings>.

RCOI and Due Diligence Measures Performed

The Company's Reasonable Country of Origin Inquiry ("RCOI") was designed to determine whether the Conflict Minerals, which are necessary to the functionality or production of a product manufactured (or contracted to be manufactured) by the Company, originated in the Covered Countries. The Company performed a good faith, risk-based, global scoping exercise to identify suppliers that were considered in-scope and subject to RCOI in the 2021 calendar year. Through communications with these suppliers, the Company attempted to identify smelters and refiners of Conflict Minerals that may be utilized in its products.

The Company's RCOI and due diligence employed a combination of measures to determine whether the necessary Conflict Minerals in Gentherm's products originated from the Covered Countries. The Company identified suppliers of commodity groups with high potential of containing Conflict Minerals. In other cases, the materials supplied were analyzed by other means. All identified Conflict Mineral suppliers were surveyed to ascertain for each Conflict Mineral (a) the smelter or refiner where it was processed, (b) its country of origin and (c) the mine or location of origin, using the CMRT and RMAP.

The Company strives for participation of suppliers but did not receive responses from all of its suppliers and, in some cases, responses were incomplete or did not appear to be accurate. Furthermore, the majority of our suppliers that did provide names of smelters/refiners and country of origin information, did so only on an entity-wide basis without distinguishing between 3TG purchased for goods supplied to Gentherm and 3TG purchased for other purposes. Because we did not receive full and complete responses covering products supplied to Gentherm from every supplier in every case, we were unable to determine the country of origin of Conflict Minerals in our products or whether such products were from recycled or scrap sources.

Smelters and Refiners

Gentherm identified 622 suppliers that were considered in-scope and subject to RCOI in the 2021 calendar year. These in-scope suppliers covered over \$416 million, approximately 85% of our total material spending. Out-of-scope vendors included those vendors providing exclusively products that were evaluated and determined to contain no metallic content. We received responses and feedback from over 70% of all in-scope vendors, covering approximately 96.4% of the in-scope spend in 2021.

The smelters and refiners that our suppliers identified in the CMRTs submitted to us for this reporting year are provided in a listing in Attachment A to this Report. Our submitted supplier CRMTs included 19 smelters or refiners that are not listed on RMI's Smelter Reference List, but are nonetheless included in Attachment A (noted in Smelter Country column as "Unknown"). As noted above, we did not receive responses from all of our surveyed suppliers, some responsive suppliers indicated they were unable to identify the smelters and refiners used to process 3TG in their products and most of the CMRTs we received from our suppliers were made on an entity-wide basis, rather than on a product-level basis; therefore, the list of smelters in Attachment A may both omit smelters that are in the Company's supply chain and include smelters that are not in the Company's supply chain.

Due Diligence Enhancements

We are working to implement additional steps during the next compliance periods to (1) determine the country of origin of the Conflict Minerals and the facilities used to mine and refine the Conflict Minerals used in, and necessary to, the functionality or production of our products and (2) further mitigate the risks that necessary Conflict Minerals contained in the Company's products finance or benefit armed groups in Covered Countries. These additional steps may include the following

- Continue to strengthen our engagement with our suppliers regarding Conflict Minerals, including requiring CMRT information from in-scope suppliers and all new suppliers for all Gentherm locations.
- Continue to educate and drive our suppliers to provide current, accurate, and complete information from their supply chain regarding their smelters and refiners of Conflict Minerals.
- Strengthen engagement with our suppliers by encouraging an open line of communication throughout the year, including involving Gentherm Purchasing and Operations teams to more actively engage our suppliers.
- Increase our efforts to identify smelters and refiners within our supply chain by evaluating the information received from our suppliers and comparing them with information published by the RMI.
- Consider transitioning business to suppliers that expressly state that they use smelters conformant with or actively engaged in the RMAP process.
- Identify opportunities to increase participation with the AIAG, RMI, and/or other relevant trade associations as appropriate, to define and improve best practices and build leverage over the supply chain in accordance with the OECD Framework.
- The Company will also review all newly acquired subsidiary suppliers and include those considered for production in 2022 reporting.

Forward-Looking Statements

Except for historical information contained herein, statements in this Conflict Minerals Report are forward-looking statements that are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The principal forward-looking statements in this Conflict Minerals Report include the Company's expected changes to its Conflict Minerals program. The forward-looking statements included in this Conflict Minerals Report are made as of the date hereof or as of the date specified herein and are based on management's reasonable expectations and beliefs. Such statements are subject to a number of important assumptions, risks, uncertainties and other factors that may cause actual results or performance to differ materially from that described in or indicated by the forward-looking statements, including (a) the continued implementation of compliance measures by the Company's direct and indirect suppliers, (b) changes in regulatory requirements relating to the sourcing of 3TG, and (c) those factors described under "Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2021 and subsequent quarterly reports. Except as required by law, the Company expressly disclaims any obligation or undertaking to update any forward-looking statements to reflect any change in its expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

Attachment A

The Company compiled the following information from CMRTs submitted by its suppliers as part its RCOI and due diligence measures. The smelter names listed below are based on information made publicly available by the RMI as part of its RMAP conformant assessments as of May 13, 2022, and also includes 19 smelters or refiners that were listed in submitted supplier CMRTs but were not included in the RMI Smelter Reference List (with Smelter Country noted as “Unknown”). All smelters or refiners noted with an “*” below have been noted as conformant with or actively engaged with the RMAP process, as of May 13, 2022.
